

We enable organisations to make the transformative shift “beyond resilience” to become anti-fragile.

We help businesses to preserve and thrive in an uncertain and disruptive world.

ABOUT KAIZEN

Kaizen Resilience Group Pty Ltd (KRG) is a specialist consulting and advisory firm helping organisations build anti-fragile concepts and organisational capabilities to ultimately preserve and thrive in a disruptive world.

At KRG, the Continuum is an organisation's journey towards becoming anti-fragile, enabling foresight and building the conditions that enable organisations to make fast, informed decisions and pivot quickly. At KRG, being anti-fragile means having the ability to bounce back stronger, unafraid of adversity and always seeking upside to gain the competitive advantage.

KAIZEN METHODOLOGY – HOW WE ENGAGE

The KRG engagement and delivery model is fundamental to establishing trusted relations and to gain deep understanding of needs and expectations. The model is unique in that a client's journey with KRG can start anywhere along the model and is continuous.

This is to recognise that each organisation is unique, having different levels of organisational maturity, risk, operational capacity and resources.

CORE CAPABILITIES

SCENARIO PLANNING

Helping organisations enable foresight and create multiple futures to thrive through adversity.

KRG helps organisations develop and detail a list of pre-emptive and trackable variables that signal a change in the business or operating environment.

These are integrated into an organisation's risk management framework where risk owners and executives can observe and monitor change variables and assign key decision-making protocols.

STRATEGIC SECURITY

Creating adaptive capacity and resilience within your business rather than protecting it from threats.

STRATEGIC SAFETY

Helping organisations develop and embed safety transformation strategies.

KRG recognises the continued evolution of safety in the modern workplace and the strategic transformative nature of safety.

KRG guides organisations to shift beyond traditional safety concepts and helps build enterprise-wide strategies.

CONTINUITY MANAGEMENT

Helping organisations identify critical risks in ensuring effective response and recovery from disruption.

KRG focuses on key elements of ensuring continuity and building in resiliency - starting with impact analysis, building up continuity plans and ensuring crisis management and recovery capabilities.
